

Aerosol Extinguisher

for fire extinguishing systems

Description

Fire detection and extinguishing system

Aerosol Extinguisher

for fire extinguishing systems

Dynamit Nobel Defence

Technical Data DCU 1012:

Dimensions (L x W x D):	200 mm x 138 mm x 54 mm
Weight:	0.5 kg
Protection:	IP 20
Operating temperatures:	-10 °C to +60 °C
Operating voltage:	24 V DC +/- 20 %
Current consumption:	0.2 A
Alarm output:	potential-free change-over contact
Alarm setpoint:	according to customer specification
Fault warning output:	potential-free change-over contact

Characteristics:

- Quick and easy assembly
- Effective firefighting directly on site
- Optical and acoustical alerting
- After replacing the fire extinguishing generators are ready for use again
- Max. 16 Fire Extinguishing Generators
- Max. 8 Fire Detectors
